

Retail ATM Program

Triton® RL5000 Model

The Triton® RL5000 model automatic teller machine (ATM) brings a superior level of performance, reliability and customization options to the embedded PC ATM industry.

This durable ATM solution allows merchants to offer their customers the convenience of an on-site ATM which may lead to increased customer traffic, increased sales volume, and an additional revenue source. From small specialty stores to larger petroleum and convenience stores, the Triton® RL5000 ATM is easily configured to meet the needs of merchants of all sizes.

The Triton® RL5000 ATM features the user-friendly Microsoft® Windows® CE 5.0 operating system and has a large capacity for storing journal records or downloading graphics for improved marketing efforts. The prominent 10.4" LCD display and sleek profile make the ATM an eye-catching component of any merchant location.

Many other on-site ATM programs can be expensive and difficult to implement, while the Triton® RL5000 offered by First Data is a complete ATM solution that includes installation, comprehensive training, technical support, service and reporting features.
